March 16, 2010

Dear Global Energy Solutions,

Thank you for providing the data concerning our energy consumption usage and history. The 10.6% reduction in electrical consumption is consistent with our observations as well. We are very happy to see these savings.

Based on the savings we are seeing, we have experienced a monthly reduction of approximately 9500 kWh per month. At our current cost per kilowatt hour, that equates to a savings of about \$1855.00 a month or \$22,260 per year.

The energy saving equipment that you installed had a cost of \$23,743.00. At the rate of savings we are currently seeing, the system will have paid for itself in just over 12 months! That is even better than what your proposal originally projected!

Obviously, we are very pleased with the results and we are recommending your products and services to others.

Sincerely,

A handwritten signature in black ink, appearing to read "George Bostwick, Sr.", written in a cursive style.

George Bostwick, Sr., President
